ACADEMY

Introduction

iFix India Training Academy is a specialized institute focused on advanced chip-level repair training for Android & Windows.

Built on the real-world expertise of iFix India, the academy delivers hands-on training using real devices, latest programmers, and professional tools. Our programs are designed to equip students with practical skills required to handle complex repairs with confidence and build a successful career in the repair industry.

Backed by **iFix India**, founded in 2015 which operates six repair centers our training is rooted in real-world experience. Students learn using the same methods, tools, and processes followed in our professional service centers.

15/1/92/5, SD Mall, Third
floor, Feelkhana,
Hyderabad, Telangana

Android Training Program

Master advanced Android diagnostics and repair with hands-on training on real devices. Learn chip-level techniques, troubleshooting, and the use of professional tools.

- Live Practical Training
- Precision Hand Skill Development
- CPU Repair from Double Decker to Latest Models
- Black Pasted CPU & EMMC Repair on Live Boards
- CPU Replacement with RPMB Understanding
- RAM Upgradation Techniques (6GB to 8GB, 8GB to 12GB & More)
- Latest Sandwich Board Layer Reballing
- Complete Booting Sequence Analysis
- Primary & Secondary Short Detection
- 5G Network Section Diagnostics
- Advanced Audio IC Troubleshooting
- No Display Light Fault Solutions
- Charging & Power Error Diagnostics
- Borneo, Bitmap & Schematic Reading
- In-Depth Component-Level Understanding
- Online & Offline Software Unlocking Solutions
- Safe Board Swapping without Data Loss
- F64, EasyTag & UFI Tool Training
- Storage Replacement & Programming
- Stuck on Logo & Auto Restart Solutions
- Oscilloscope Usage & Signal Analysis
- Wi-Fi, Bluetooth & GPS Fault Troubleshooting

Windows Training Program

Gain in-depth knowledge of laptop hardware and motherboard repairs through practical learning. Develop skills in fault finding, component-level repair and advanced diagnostics.

- Windows Bootable Creation & OS Installation
- Operating System Setup with Essential Software
- Laptop Assembly & Disassembly Training
- Peripheral Replacement (Battery, Keyboard, Display & More)
- Basic Electronics & Component Testing
- Step-by-Step Motherboard Section Explanation
- Caps Lock Blinking Error Solutions
- Beep Code Diagnostics & Troubleshooting
- BIOS Programming & Recovery
- Component Removal & Soldering Techniques
- SIO Replacement & Programming
- CPU Reballing & Replacement
- Complete Power Sequence Analysis
- Display Sequence Troubleshooting
- Battery Charging & Detection Repair
- Restart & Auto Reboot Issue Solutions
- System Hanging & Performance Troubleshooting
- No Power Diagnosis & Repair
- No Display Fault Troubleshooting
- Live Practical Repair Training
- Audio IC & Sound Issue Repair
- Oscilloscope Training & Signal Analysis

Our Android Trainers

Our Android trainers bring extensive hands-on experience in smartphone diagnostics and repair, guiding students through practical training and real-world troubleshooting to build strong technical skills and confidence.

Ramesh

"We focus on real repairs so students gain true hands-on confidence."

Suraj

"We train you to diagnose and fix issues like a real technician."

Our Windows Trainers

Our Windows trainers bring extensive experience in laptop diagnostics and hardware troubleshooting, guiding students through practical, real-world repair scenarios to build confidence and professional-level repair skills.

Manjunath

"We simplify complex repairs through practical, hands-on training."

Azad

"We train students to handle real repairs with skill and confidence."

Course Details & Duration

Android Training Program

30 Days

Hands-on Android repair training with real-world diagnostics and troubleshooting.

At iFix India Training Academy, our courses provide hands-on, real-world repair training across Android and Windows.

Windows Training Program

45 Days

Laptop repair training with chip-level diagnostics and troubleshooting.

Taught by experienced professionals working on live devices, each module builds strong practical skills and technical fundamentals. With advanced tools and real-time problem solving, our training prepares students for a confident entry into the repair industry.
