## Training backed up by expertise

Backed by iFix India, founded in 2009 which operates six repair centers our training is rooted in real-world experience. Students learn using the same methods, tools, and processes followed in our professional service centers.

# iPhone Training Program

Master advanced iPhone diagnostics and repair with hands-on training on real devices. Learn chip-level techniques, troubleshooting, and the use of professional tools.

- Live Practical
- Assembly & Disassembly
- Digital Electronics
- Complete Instruction on JCID & LUBAN
- Removing Battery Error using JCID or W09
- Display Error Removing without Risk (Original & Copy)
- Rear Camera Error Removal
- Face ID Repair up to Latest Model\*
- Replacing the Front Camera without Affecting Face ID
- Track Rebuild and Layer Separation
- EEPROM Testing
- Baseband Repair
- NAND Errors, Programming & Upgradation
- Use of OG, Bitmap & Schematics
- Detailed Explanation of Voltage Lines
- Identifying and Diagnosing Primary and Secondary Shorts
- Complete Knowledge of Board Swapping & Components
- CPU Internal Pad Repair
- Understanding of Panic Reports
- SPI PROGRAMMING USING CH341A
- Protocols: i2C, SPI, MIPI, LPDP & UART
- Hand Skill Development

# MacBook Training Program

Gain in-depth knowledge of MacBook hardware and motherboard repairs through practical learning. Develop skills in fault finding, component-level repair and advanced diagnostics.

- Live Practical
- MacBook Assembly & Disassembly
- MacBook in Recovery Mode/ DFU Mode Repair Process & OS Installation
- DFU Mode Restore Error Code 6, 9, 35, 4010, 4014, 4017, 4042, etc
- Basic & Digital Electronics
- Explanation of Operation Amplifier & Current Sensor
- Explanation of PWM Buck & Boost Converter
- Logic Board Architecture
- Explanation of Data Communication Bus: I2C, I3C, SPI, UART, etc.
- Schematics & Board View Explanation
- Logic-Board Explanation of all Section
- SMC Chip Explanation
- BIOS Chip Programming
- Explanation of 5v to 20v Power Delivery Sequence
- Explanation of MacBook Logic Board Power on Sequence
- How to Diagnose MacBook not Powering on
- MacBook Powering on but no Logo
- Onboard NAND Chip Replacement & Upgradation
- Onboard RAM Chip Replacement & Upgradation
- Explanation of Oscilloscope Function Keys & Configuration
- M Series Model Wi-Fi Module Unbinding & Programming
- Hand Skill Development

# Our iPhone Trainers

Industry experts with hands-on experience in advanced chip-level repairs, our iPhone trainers focus on real-device training and practical techniques. They ensure every student gains the skill and confidence to handle complex repairs independently.

**Ramesh**

iPhone Master

Our goal is to simplify complex chip-level repairs for every student."

**Lohit**

iPhone Master

We focus on real repairs so students gain true hands-on confidence."

**Ishtiyaaq**

iPhone Master

We train you to diagnose and fix issues like a real technician."

# Our MacBook Trainers

Our MacBook trainers bring deep expertise in motherboard diagnostics and advanced repairs, simplifying complex concepts through practical learning to prepare students for real-world challenges.

**Shubam**

Macbook Master

Our training focuses on real diagnostics, not just theory."

**Rohit**

Macbook Master

"We train you to think like a professional technician daily."

**Manju**

Macbook Master

We prepare you to handle professional MacBook repairs with confidence."

### Master Level iPhone Training

Advanced chip-level iPhone repair with hands-on training.

**Duration:** 30 Days

### Master Level MacBook Training

Advanced MacBook diagnostics & motherboard repair.

**Duration:** 45 Days

## Course Details & Duration

At iFix India Training Academy, our courses provide hands-on, real-world repair training across iPhone and MacBook devices.

Taught by experienced professionals working on live devices, each module builds strong practical skills and technical fundamentals. With advanced tools and real-time problem solving, our training prepares students for a confident entry into the repair industry.
